Horrible place to work

Outreach Specialist

Sacramento, CA

My experience with management at Serene Health was disappointing, especially with Ramon Anguiano. In my opinion, the management style came across as passive-aggressive and disorganized. Communication and leadership lacked professionalism, and there seemed to be difficulty handling responsibilities effectively. Overall, the workplace environment felt poorly managed and stressful.

Do NOT WORK FOR OUTREACH! You will be under incompetent leadership.

Everyone from each location has the same issue with the same leadership.

RUN!!!!!!!!!!

14 May 2026

People are great Management is awful

Patient coordinator

Tinley Park, IL

The level of unprofessionalism at this company is absurd. There is constant turn over because they don't compensate employees fairly for their work. There is zero organization and zero accountability on behalf of management. It's the most chaotic work environment I've ever experienced.

Pros

The staff is nice

Cons

It's chaos when it comes to management

It's a decent job

Lead Care Manager

San Diego, CA

What is the best part of working at the company?

The job is very flexible, and you have the option to work 4/10s

What is the most stressful part about working at the company?

The expectations change on very short notice

What is the work environment and culture like at the company?

It's okay , as long as you start out of work place drama you'll be fine

What is a typical day like for you at the company?

Making calls, creating care plans and doing field work

23 April 2026

Do not work here

Lead Care Manager

San Diego, CA

Awful place to work with extremely poor management. This place will deteriorate your mental health. PLEASEEEEE read Glassdoor reviews before accepting the offer. They will hire anyone because they work them to the bone

Pros

Nons

Cons

Poor management, poor pay and benefits

19 April 2026

Easy Onboarding

Lead Care Manager

Initial application, responsive and rapid recruitment contact turn-around, virtual meet and greet screening, quick in-person team interview and onboarding process is relatively seamless.

5 March 2026

Horrible company! Look somewhere else!

Lead Case Manager

What is the best part of working at the company?

Absolutely NOTHING!!! Worst company to work for. You get no support, management is horrible and does not communicate with each other. When you voice your concerns, they ignore you.

What is the most stressful part about working at the company?

They expect you do 100 different task without training you properly and expect you to understand it within a few days not even a week .

What is the work environment and culture like at the company?

Horrible you will be micromanage. You have to let everyone know what you are doing at all times.

3 March 2026

Micromanagement, low trust, and poor morale made it extremely painful to wake up and go to work each day.

Lead Care Manager

El Centro, CA

What is the best part of working at the company?

Helping the members is the only good part of this company. Other than that's Micromanaging is extreme. You can't even go comfortably to the restroom.

What is the most stressful part about working at the company?

The micromanaging, the watching your every move, making one person do the job of multiple, ridiculous expectations and no flexibility.

Management and HR are unprofessional and extremely rude.

What is the work environment and culture like at the company?

The work environment is highly micromanaged, with limited trust or autonomy given to team members. Tasks require excessive oversight, and decisions are frequently second-guessed, which slows productivity and discourages initiative. Feedback is often critical rather than constructive, creating a culture where employees focus more on avoiding mistakes than contributing ideas. This

approach has negatively impacted morale, collaboration, and overall team engagement.

3 March 2026

Micromanaging

Lead Care Manager

El Centro, CA

Unfortunately, the work environment at this location is extremely difficult due to poor management practices and excessive micromanagement. Employees are required to track and document nearly every task through multiple spreadsheets, outreach logs, and internal lists that are often incomplete or outdated. Instead of supporting staff, this level of micromanagement creates unnecessary stress and inefficiency.

Our office is required to complete significantly more administrative tracking and outreach requirements than other locations, including additional contact attempts, swap lists, spreadsheets for in-person visits, and documentation systems that are not consistently used across the organization. This creates an unequal workload compared to other offices.

Policies are also enforced inconsistently. Some employees have been disciplined for dress code violations while others have openly violated the same policies for extended periods of time without any consequences. This creates a perception of favoritism and unequal enforcement of company rules.

Communication with management and HR has also been problematic. Concerns raised by employees regarding workplace issues and policy inconsistencies have gone unanswered for long periods of time.

There have also been concerns related to workplace health and safety practices that were not handled appropriately, which resulted in staff becoming ill and missing work.

The high turnover of employees and supervisors reflects the overall management culture and the level of frustration experienced by staff. I hope leadership takes steps to address these issues by improving communication, ensuring fair policy enforcement, and reducing unnecessary micromanagement so employees can focus on providing quality work.

17 February 2026

High turnover rate

Lead Care Manager

Difficult to set boundaries here, even with a high case load and expectations. You will be expected to find resources on your own and to be creative when helping clients.

12 February 2026

Great communication and team support

Data Entry

San Diego, CA

Working here was a very rewarding experience both professionally and personally. It is a dynamic environment where teamwork, open communication, and data-driven decision-making are truly valued. I had the opportunity to optimize processes, develop reports and dashboards, and collaborate with different teams to improve operational outcomes.

The culture encourages accountability, mutual support, and professional growth. I felt heard and appreciated, and I was able to contribute my analytical and organizational skills to create meaningful impact. I would definitely recommend this workplace to anyone looking to grow and make a difference.

22 December 2025

Micromanaging and unfair treatment (expected to call 100+ monthly)

Lead Care Manager

Los Angeles, CA

Company doesn't care for employees. Dismiss complains about unfair treatment/harassment from higher management. Micromanaging, employees are stressed.

Pros

honestly none

Cons

micromanaging, unfair treatment, high work load, stress

Micromanaging

Anonymous

This is a great place if you love helping people, but upper management ruins it by micromanaging everything you do. You start on a 90 day probationary period, and they have very strict rules.

16 November 2025

Accommodating but stressful

Therapist

Supervision is very helpful. They work with you if you are willing to work with them. Case Load can be a bit high in order to account for no-shows.

31 October 2025

Upper management micromanagement

Lead Care Manager/Enhanced Care Manager

Los Angeles, CA

Upper management micromanages. Heavy case load, you have to make calls, put notes in, have in person visits with members, along with other assignments. You never really have time to help members with their requests for medical assistance (such as helping members find a pcp, dentists, accompany members to Dr appointments)

Pros

If you're empathetic and love helping others, this is a good field

Cons

Upper management micromanagement, they have cameras in the office for upper management to listen and watch

Overall good job but management ruins it

Lead Case Manager

San Diego, CA

The job itself is great, you're always occupied, time goes by quickly, and the work is very rewarding. I genuinely love what I do. Unfortunately, management makes the experience difficult. They micromanage to an extreme level, even when you're doing excellent work and staying on top of things, which feels unnecessary. At times, they will get you in trouble over the smallest issues, which is demotivating and, I believe, one of the main reasons people quit. You might really enjoy the job in your first week, but after a while, you start to realize how poor some of the management can be. It's not every one of them, but a few of them have ruined the experience for me, which is disappointing because I used to love working here. Co-workers are the best part of the job though.

Pros

Co-workers

Cons

Management

Great team

Anonymous

Good support system. They care about their employees and it is a company that cares about the community. The company values align with my own. It is a great company

9 May 2025

RUN dont walk away

Associate Marriage and Family Therapist

San Diego, CA

What I believe I learned:

I learned how to survive in chaos and how not to treat employees. I learned that burnout is real and that protecting your boundaries and mental health is essential. Unfortunately, I did not grow as a clinician here—I spent more time surviving than developing.

Management:

Disorganized and reactive. Policies shift constantly, often without being communicated. Feedback feels more like blame than support, and there is little investment in your development as a professional. Questions or concerns are often brushed off, and decisions are made from the top down with little transparency.

Workplace culture:

Toxic. The people who last here either disengage emotionally or stop asking questions. Passion and drive are not rewarded—they're drained. If you want to clock in, do the bare minimum, and collect a paycheck, you'll probably be fine. But if you're hoping to learn, grow, and feel supported, this is not the place.

Pros

The clients. They're the reason I stayed as long as I did. Working with them was meaningful, but they deserved clinicians who weren't barely staying afloat.

Cons

Feeling like no one cares if you're okay. There's no room to process, reflect, or even breathe. The emotional toll adds up quickly, and support is rarely offered unless you're already in crisis.

Good place to work at

CS Staff

San Diego, CA

If you are organized, you can get to excel in your position. Management is not perfect; they try their best as a growing company and fast-paced environment. I have noticed that ones that struggle in their position at the company are the ones that cannot take direction or constructive criticism. Attendance is a big thing and attention to detail.

Those that complain are the ones that don't like to work and don't want to learn.

I love what I do.

Pros

Great co-workers and benefits.

Cons

Not enough paid holidays.

Bad supervisor

Lead Care Manager

San Diego, CA

I enjoyed my coworkers and the job felt rewarding. You will learn a lot about the healthcare system.

Cons:

-Healthcare company that doesn't offer comprehensive medical insurance.

-Accrued time off only but they "value" mental health and self care. I recommend joining the 21st century and offer two weeks.

-Everyone on a certain supervisor's team quits because she looks for reasons to get you in trouble instead of being a good leader. The office manager is all about positivity but is besties with the supervisor who is condescending.

-The job is difficult enough. Please don't add to the stress of the job by setting unrealistic expectations.

Most toxic environment ever!

Community Supports

San Diego, CA

Hands down, the very worst company I've ever worked for. The lack of effective leadership is evident because they do NOT support the employees. Whenever you ask for support with a member, they ask you to email but blatantly disregard their emails so you are left unsupported. The upper leadership makes sure to push out the staff that are effective and genuinely care about their work performance and their members. The only thing they are concerned about is making your calls and do not focus on "quality" when it comes to helping the homeless population find housing. It's all about making sure that they can bill the various Cal-Aim programs for money. The environment is extremely fake and so is the authenticity of the leadership. If you are looking for a job where you will not be appreciated and you get constantly brushed off and lied to, this is definitely the job for you! If you are passionate about helping the homeless population find housing and you genuinely care about what you are doing, definitely don't go to this employer. They will burn you out and sour your taste for working with a disadvantaged group of people.

Management is the worst and burnt out work.

Community Support Lead Case Manager

Sacramento, CA

The company is very unprofessional and management does not know how to manage a thing and never gets back to you but wants you to complete 10,000 tasks a day. They are not held accountable when they are in the wrong and will back one another for the wrong they do. There is always constant changes and last minute announcements regarding any news or days off. The pay is not what they say and will not budge. And they wonder why they get such a bad turn over from their employees and the people enrolled. Very unorganized company who is trying to grow but does not manage anything. They have clowns running the show and you are under surveillance with no consent signed or information given about it. It is mentally exhausting being in that kind of environment. No room for growth at all there.

Pros

A few colleagues and the members you work for

Cons

Management for sure, even HR, the pay and the mentally draining work they expect out of you for the less pay

Hostile work environment**Licensed Mental Health Professional**

Chicago, IL

What is the best part of working at the company?

Variety of behavioral health clientele

What is the most stressful part about working at the company?

Poor Management & Expansive caseloads

What is the work environment and culture like at the company?

Stressful work environment. Minimal diversity.

17 September 2024

The work environment was mentally exhausting, with unrealistic expectations and a lack of support from management

Lead Care Manager

San Diego, CA

My experience at SERENE HEALTH was unfortunately disappointing. The work environment was mentally exhausting, with unrealistic expectations and a lack of support from management. There was little regard for employee well-being, leading to high levels of stress and burnout. The company culture did not foster growth or positivity, and many employees, including myself, felt undervalued and overworked. I hope the company takes serious steps to improve how they treat their staff, as a healthy and supportive work environment is crucial for long-term success. San Diego office is a joke.

Management

California

What is the best part of working at the company?

Leadership recognizes those who go above and beyond

What is the most stressful part about working at the company?

The industry changes frequently

What is the work environment and culture like at the company?

Comfortable , collaborative and fun

What is a typical day like for you at the company?

Meetings, calls, and working on projects

20 March 2023

Great management

Behavioral health patient coordinator

San Diego, CA

I worked here as a behavioral health patient coordinator for about a year and a half. The work itself was fulfilling but what made my time here great was working with people who truly cared about the mission of helping people get mental health services, particularly talk therapy. The specific department I worked for was managed really well, which made it easy to wake up every day knowing that the department/supervisor had each employee's best interest at heart.

3 December 2022

Productive and work life balance is great

Clinician II

San Diego, CA

Staff is helpful and documentation is very simple.

Notes turn around time is 72 hours which is really great. Compensation is good.

Documentation training is good.
